

MicroC™ - Technical Specifications

A Safer, More Economical Carbon Source for Wastewater Denitrification

Product description MicroC™ is a proprietary wastewater treatment chemical developed by Environmental Operating Solutions, Inc. MicroC™ was designed specifically for use as an electron donor/carbon source for wastewater denitrification applications.

Physical properties/ specifications	Physical State	Liquid
	Color	Light Blue/Green
	Odor	Mild Alcohol Odor
	Specific Gravity @ 25°C	1.18
	Density (lbs/gal)	9.84
	pH	5.3-5.8
	Viscosity (centipoises)	16.4
	Solubility in water	100%
	VOC Concentration	0% (EPA 8260B)
	Freezing point	-4 F (-20 C)
	COD Value	670,000 mg/L
